

Implementing Microsoft Hyper-V on Data ONTAP - NA-IMPMSHV

Course Summary

Description

Implementing Microsoft Hyper-V on Data ONTAP (IMPMSHV) is a 2 day instructor led course where you will learn how to design and implement virtualization solutions on NetApp® storage systems using Microsoft Hyper-V. You will also discover how to deploy the Microsoft Windows Server 2012 R2 virtual infrastructure on Data ONTAP storage.

Topics

By the end of this course, you should be able to: Describe Microsoft Windows Server 2012 R2 Hyper-V virtualization solution Articulate the NetApp value proposition when integrating the Data ONTAP operating system with virtualization solutions Describe the main concepts, terminology and operation of SnapManager for Hyper-V v2.1 Demonstrate the configuration of SnapManager for Hyper-V v2.1 hosts, datasets, policies, event notifications and reporting Identify capabilities, functions and integration of the Microsoft and NetApp management, backup, and migration tools in a public, private and hybrid cloud environment

Audience

NetApp employees, channel partners, and customers.

Prerequisites

NetApp core technical training or equivalent knowledge NetApp SAN core technical training or equivalent knowledge Basic knowledge of Microsoft virtualization and hypervisors

Duration

2 Days
